Les and Des,

I just wanted to take a minute to thank you for all of the computer services that you have provided for our ministry over the years.

We have been very impressed with the way you have kept us informed with the repair process as you go. There were no surprises as there have been with other computer repair companies that we have worked with in the past.

Over and over we have seen first hand, as well as hearing of companies that bring you in for a "quick check up" and then finding some very costly repairs needed. Most of which were very questionable to say the least.

You have more than once saved some extremely important information/files that we thought were lost forever. Some of these files could never be replaced or duplicated.

You have as well, talked me through several small repairs that most companies would have charged "an arm and a leg" to do.

Your help with virus protection, adware/malware, and such, has saved us countless hours of grief and money.

I was looking for a place on your website to post a reference, but I was unable to do so at this time so, I would hope that you would post this as a letter of reference for Ask Us Computer Services.

Integrity in business in this day and age is almost unheard of, it is always a pleasure to find a company who wants to do business in a way that makes someone want to come back over and over. I believe Ask Us Computer Services is just that, a company with integrity.

You have helped with our website, registering our domain name, and even helped me do some simple tune ups.

Thank you, thank you, thank you, what a blessing you have been to our ministry.

Sincerely,

Rev. Jim Kent
